The Emeriti Association is seeking candidates for open board positions of Vice President, Treasurer, and Communications Chair for the next academic year.

(notes from the )e\*ruar! +meriti meetin,  
+resident Rose Rossiter circulated a Beague of Aomen Ooters  
petition regarding limiting gerrymandering. More information  
can be found at [6https://citizensnotpoliticians.org/petition/?7](https://citizensnotpoliticians.org/petition/)

Marty Tuc. showed pictures of a multi-colored beech tree  
honoring the late Emeriti Oice +resident /cott Moody which has  
been planted in the Emeriti +ar. along with a plaCue that has  
been posted. #e also noted that the Facilities Department has  
lately been doing a better Job of maintaining the +ar. .

Tuc. reported that Ro-anne al./Orune, Director of ;rant  
De,elopment and +roEects in the Oice +resident for !esearch  
" ffice at " hio =ni ,ersity could not be with us as scheduled due  
to health reasons.

#owe ,er, she had arranged for si- students who had been supported by the " hio =ni ,ersity  
=ndergraduate /tudent Travel Fund to summarize their research as presented at professional conferences.  
Tuc. then introduced students ; abby Bindsey, Cherie Dimello, Emily Gones, +eter !ider, Maranda  
/tric. lin, and #iley Hresse.

%a\*\*! Lindse! collected red fresh water algae samples from throughout  
the lower peninsula of Michigan and reported her research findings at the  
Iortheast Algal /ociety [6https://e-neas.org/?7](https://e-neas.org/) in Mystic, Connecticut. The

+mil! Jones researched use of American Sign Language, specifically studying how the face (mouth, eyebrows, etc) moves with A/B and further research on A/B communication ability while walking, presenting a literature review and two poster sessions at the American Sign Language Hearing Association conference <https://home.asha.org/> in Lew " rleans.

Peter Rider, who studies paleontology, geology, biology and paleontology, introduced the audience to Kevin Allen, the skeleton of an allosaurus, a carnivorous dinosaur whose bones were found in Montana about 70 million years ago. Peter developed digital reconstructions from scan data of the skull internal structures. The data allowed studies of the individual bones and reconstruction of models especially of those sections which held the soft
